

Specification of Anti Caking Agent:

- * Appearance : Liquid at room temp.
- * Flash Point : 150 °C min.
- * Viscosity 70 °C : 50 CST max.
- * Red. in crushing load on ANP(0.05%) : 50% min.
- * Red. in crushing load on CAN(0.05%) : 50% min.
- * Fluorescence : Present on ANP & CAN
- * Homogeneity : Homogenous
- * pH of 10% solution in water : 7.0 to 8.5
- * Layer separation : No layer should be separated
- * Free Ammonia as NH₃ : Nil
- * Amine as (OctaDecyle Amine) : Nil
- * Pour point : 12 Degree Celcius max.
